

REACT 10

Code:

App.css

```
.textRed {
  color: red;
}

.textGreen {
  color: green;
}
```

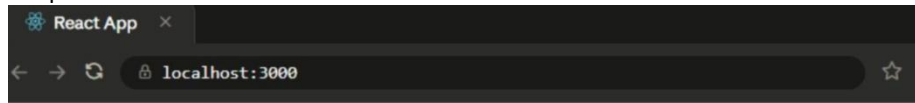

App.js

```
import React from 'react';
import './App.css';
import officeImg from './office.jpg';

function App() {
  const element = 'Office Space';
  const jsxatt = <img src={officeImg} width="25%" height="25%" alt="Office Space" />;
  const officeList = [
    { Name: 'DBS', Rent: 50000, Address: 'Chennai' },
    { Name: 'HSBC', Rent: 75000, Address: 'Bangalore' },
    { Name: 'Infosys', Rent: 45000, Address: 'Hyderabad' },
  ];
  return (
    <div>
      <h1>{element} , at Affordable Range </h1>
      {jsxatt}
      {officeList.map((itemName, index) => {
        let colors = [];
        if (itemName.Rent <= 60000) {
          colors.push('textRed');
        } else {
          colors.push('textGreen');
        }
        return (
          <div key={index}>
            <h1>Name: {itemName.Name}</h1>
            <h3 className={colors[0]}> Rent: Rs. {itemName.Rent}</h3>
            <h3> Address: {itemName.Address}</h3>
          </div>
        );
      })}
    </div>
  );
}
```

```
}  
export default App;
```

Output:

Rent: Rs. 50000

Rent: Rs. 75000

Rent: Rs. 45000
